PROJECT: "INHIBIT-E™ Analysis"

RTP Labs ID: 09-117-4

Presented below are the laboratory results of the analyses for the sample received on April 6, 2009. We received one sealed bottle of INHIBIT-E™, 75 capsules. Five capsules were randomly selected and individually weighed, combined and the amount equal to one capsule was extracted and analyzed by GC/MS for 1,4,6-Androstatriene-3,17-dione (ATD) molecular weight of 282. A reference standard was used for the GC/MS analysis.
