

Mass FX™ is the latest break through product released by Anabolic Xtreme. It is non-hormonal pro-anabolic based on a custom synthesis for a compound we call 25R-diol™. Mass FX™ is a combination of four synergistic non toxic ingredients. As the 25R-diol™ begins to kick in you will feel the difference we call the “Alpha Male” within the first 3-5 days. There is no raised blood pressure, no liver toxicity and no negative impact on lipids. When stacked with Hyperdrol™, there is no need to worry about the body's uncanny knack of trying to match your increased testosterone by elevating estrogen because Hyperdrol™ manages the HPTA feedback loop. Prime the pump with Hyperdrol™ then ignite the Alpha Male with MassFX™.

25R-DIOL

25R-diol™ AKA (3b,5a,6a,25R)-Spirostan-3,6-diol

25R-diol™ is an amazing new synthesis related to a compound studied by Russian scientists in the mid 1970s. While those studies showed an amazing anabolic to androgen ratio, they studied the 6-keto analog. We have further refined the compound referenced in the Russian studies with a custom synthesis to create a 6-hydroxy analog which vastly improves on the original 6-Keto formula because of it's resistance to metabolic inactivation. The 6-keto is a primary oxidative metabolite of 25R-diol™ so 25R-diol™ is a pro-form of 6-keto with better benefits and a longer active biological half-life.

So how does it work? 25R-diol™ has direct anabolic effects on androgen receptors however it causes no endogenous shutdown of testosterone biosynthesis. This is because 25R-diol™ has minimal intrinsic androgenic activity at those receptors. It is important to remember that androgenicity and anabolism are related. Since the compound has high receptor affinity, it will bind securely

to Androgen Receptors. But because of its low intrinsic activity it's not very stimulating (like deca for example) thus you get a good anabolic but a weak androgen. This is the key to 25R-diol™. Regardless, although it is a weak androgen, studies have shown that 25R-diol™ is an excellent libido enhancer. This very positive side effect is a result of enzyme activity which causes smooth muscle relaxation from enhanced nitric oxide formation. Studies have also shown that 25R-diol™ boosts LH activity slightly and acts as a mild reductase inhibitor to counter androgenic effects. This is based on the anti-androgenic effect of a reductase inhibitor on the hypothalamus which in turn signals the pituitary to start cranking out more LH. This explains why this compound is so clean with none of the typical androgenic side effects.

Nettle root extract (95% (-)-3,4-divanillyltetrahydrofuran or DVTHF)

By now you've heard all about the incredible nettle extract that has the amazing ability to free up bound testosterone. MassFX™ uses an ultra high (95%) potency quality extract. This is the highest quality extract available today.

How does it work? Most circulating testosterone is bound to a plasma protein called Sex Hormone Binding Globulin (SHBG) and is thus inactive. SHBG normally binds over 90% of your total testosterone so that it cannot exert its effects on androgen receptors (ARs). DVTHF is a lignan found in stinging nettle, which binds to SHBG allowing your testosterone to be freed so that it binds to Androgen Receptors for muscle growth. This lignan shows very high binding affinity for SHBG being practically equal to that of DHT, the standard! Although free test is significantly elevated at the recommended dose, so is total test and amazingly estradiol is lowered! The lack of estradiol production from the higher free test levels in Mass FX™ is related to the sterol content of the 25R-diol™.

6,7-dyhydroxybergamottin

Also known as DHB we use this compound acts as a CYP enzyme inhibitor to prolong the activity of the 25R-diol™ once in the blood stream. The active ingredient in DHB is derived from the furanocoumarin family. Many studies on this natural extract show large increases in plasma (blood) drug concentrations when ingested with or around the same timeframe as the target compound. DHB greatly improves the activity of 25R-diol™.

Bioperine®

Licensed from Sabinsa, Bioperine® plays a critical role in absorption of 25R-diol™ from the gut and increases its active nutrient transportation. It is a standardized extract from the fruit of *Piper nigrum L* (black pepper) and contains a 95% extract of piperine.

Stacking Mass FX™

Ultimate 12 Week Mass Cycle:			
WEEK	Hyperdrol	Mass FX	Retain
1	3-4/Day caps	2/Day caps	1/Day cap
2	3-4/Day caps	4/Day caps	1-2/Day cap
3	3-4/Day caps	4/Day caps	1-2/Day cap
4	3-4/Day caps	4/Day caps	1-2/Day cap
5	3-4/Day caps	4/Day caps	2/Day cap
6	3-4/Day caps		3/Day cap
7	3-4/Day caps	-	3/Day cap
8	3-4/Day caps	2/Day caps	2/Day cap
9	3-4/Day caps	4/Day caps	1-2/Day cap
10	3-4/Day caps	4/Day caps	1-2/Day cap
11	3-4/Day caps	4/Day caps	1-2/Day cap
12	3-4/Day caps	4/Day caps	1/Day cap

Warning: Keep out of the reach of children. Not for use by pregnant or nursing women, or persons under the age of 18. This product is intended for use by healthy male individuals only. Always consult a physician before beginning this or any dietary supplemental and/or training program. Do not use this product if you have a family history of prostate or kidney disease, endocrine condition or any other medical condition. If you are taking any dietary supplement or prescription drugs, consult with a physician before using this product. Do not exceed suggested dosage to avoid potential adverse negative side effects. These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, or prevent any disease. If you are an athlete subject to performance enhancing substance testing, you should discuss the use of Mass FX™ with your sanctioning commission or body before using them.
