PROJECT: "P-STANZ™ Analysis"
RTP Labs ID: 09-353-6

Presented below are the laboratory results of the analyses for the sample received on October 21, 2009. We received one sealed bottle of P-STANZ™, 90 capsules. Five capsules were randomly selected and individually weighed, combined and the amount equal to one capsule was extracted and analyzed by HPLC for the listed ingredient. A reference standard was used for the analysis and the precision and accuracy are within expected range of $\pm 10\%$.
