 Suite I  
 Fort Myers, FL 33901

COLLECTED: 12/16/2020 08:50AM PST  
 RECEIVED: 12/16/2020 08:50AM PST  
 REPORTED: 12/17/2020 05:28AM PST

Clinical Info:

Test Name	Result	Flag	Reference Range	Lab
<b>ESTRADIOL, REBASELINE</b>				
ESTRADIOL	65	HIGH	< OR = 39 pg/mL	01
<p>Reference range established on post-pubertal patient population. No pre-pubertal reference range established using this assay. For any patients for whom low Estradiol levels are anticipated (e.g. males, pre-pubertal children and hypogonadal/post-menopausal females), the Quest Diagnostics Nichols Institute Estradiol, Ultrasensitive, LCMSMS assay is recommended (order code 30289).</p> <p>Please note: patients being treated with the drug fulvestrant (Faslodex(R)) have demonstrated significant interference in immunoassay methods for estradiol measurement. The cross reactivity could lead to falsely elevated estradiol test results leading to an inappropriate clinical assessment of estrogen status. Quest Diagnostics order code 30289-Estradiol, Ultrasensitive LC/MS/MS demonstrates negligible cross reactivity with fulvestrant.</p>				
<b>FSH</b>				
FSH	6.2	NORMAL	1.6-8.0 mIU/mL	01
<b>TESTOSTERONE, TOTAL</b>				
TESTOSTERONE, TOTAL, MALES (ADULT), IA	367	NORMAL	250-827 ng/dL	01
<b>TSH</b>				
TSH	1.42	NORMAL	0.40-4.50 mIU/L	01
