

## “FAT BURNERS DON'T TRULY BURN FAT”

THE FAT BURNER CATEGORY HAS GOTTEN A HORRIBLE REPUTATION OVER THE PAST DECADE. PRODUCTS THAT ARE SUPPOSED TO HELP USERS SHED BODY FAT AND KICK UP METABOLISM ARE SIMPLY LOADED WITH CAFFEINE, STIMULANTS, AND DON'T DO MUCH FOR WEIGHT LOSS AT ALL. PROVEN INGREDIENTS ARE ABANDONED AS PEOPLE CHASE AFTER STIMULANT HIGHS AND “NON-STOP ENERGY.”

LET'S FACE IT: THESE “CRACK PILLS” THAT ARE BEING SOLD AS FAT BURNERS DO NOTHING BUT GET PEOPLE'S HEARTS RACING AND MAYBE MAKE THEM SWEAT A LITTLE MORE. NO FOCUS, NO FAT LOSS, JUST ERRATIC, OVER-THE-TOP ENERGY FOLLOWED BY AN INEVITABLE CRASH. WHAT'S THE POINT OF EVEN USING THESE PRODUCTS?

# PYROXAMINE®

**“BUT IF I FEEL SOMETHING, IT HAS TO BE WORKING, RIGHT?” WRONG.** Stimulants are all well and good, but shouldn't be the only things in fat burners that elicit an effect. Everyone wants to “feel good” from their thermogenic, but that doesn't mean you have to overload your adrenals with excessive amounts of stimulants. Couple this with one simple fact: dieting sucks and isn't always the most enjoyable experience. Energy levels dip, and you struggle to lose pounds of body fat despite your best efforts. There's a reason why people waver when trying to get in shape, and it's simply that it's not a fun time. Instead of another stimulant-laden formula, we opted to give you a legitimate, feel-good fat burner. Meet Pyroxamine: Your adipose annihilating powerhouse. Start taking a fat burner that will actually help you lose fat.

Remember the last time you were blown away by a thermogenic product that was more than just a massive dose of stimulants? ...Yeah, neither do we. That's why you won't find a ridiculous stimulant blend in Pyroxamine. This would just prevent ingredients that truly help fat loss from being dosed properly. Proven ingredients that help users shed fat and feel great was our goal here, and we more than managed to achieve this:

### PYROXAMINE™ Ingredients Highlights:

**CAFFEINE ANHYDROUS:** At only 75mgs per serving, users don't have to worry about building up a massive tolerance or getting “jittery.” Just enough to be beneficial in regards to increasing alertness, wakefulness, and as a CNS stimulant.

**PIKATROPIN:** Known as Picamillion, this ingredient can bypass the blood-brain barrier, is hydrolyzed into GABA and Niacin upon ingestion, and is known for increased mental focus in addition to having an anxiolytic response.

**CITICHLINOLINE:** As a direct precursor to acetylcholine, citicholine is known to support higher acetylcholine levels by providing a higher bioavailable choline source. Acetylcholine is the neurotransmitter responsible for muscle contractions. Evidence also suggests that citicholine can improve attention and focus.

**THEOBROMINE** – A methylxanthine class compound (same class as caffeine) that is a potent vasodilator and bronchodilator. It is less impacting on the central nervous system but stimulates the heart to a greater degree.

**HORDENINE** – This amine acts as a MAO-B inhibitor and allows for longer lasting effects from stimulants. Hordenine has also shown to raise norepinephrine levels.<sup>[27]</sup>

**N-METHYL-TYRAMINE** – Shown to activate Trace Amine-Associated Receptor 1 (TAAR1).<sup>[28]</sup> This newly found receptor has been associated with increasing cAMP and promoting alertness and improved cognition.<sup>[29,30]</sup>

**HIGENAMINE** – Shown to be a Beta-2 adrenoceptor agonist, Higenamine has shown to be a cardiac stimulant, cause vasorelaxation, and act as a bronchodilator. <sup>[31,32,33]</sup>

**HUPERZIA SERRATA (STD. HUPERZINE A)** – Known for its ability to be a potent acetylcholinesterase inhibitor. Huperzine A prevents acetylcholine from being broken down, thus leading to higher acetylcholine levels.<sup>[34]</sup>

**BLACK PEPPER (STD. PIPERINE)** – Shown to inhibit CYP3A4 enzyme which is responsible for the metabolism of many drugs.<sup>[36]</sup> By inhibiting drug metabolism, piperine may increase the bioavailability of various compounds.<sup>[37]</sup>

**RAUWOLFIA VOMITORIA (STD. RAUWOLSCINE)** – Similar in structure to yohimbine. Rauwolscine has shown to be an alpha2-adrenoceptor antagonist.<sup>[38]</sup> Blocking this receptor will cause an increase in norepinephrine, vasodilation, increase acetylcholine, and increase lipolysis.<sup>[39,40]</sup>

**CARRALLUMA FIMBRIATA:** This herb has been used in Ayurvedic medicine and has been shown to be a highly effective appetite suppressant and weight loss agent.

**OLIVE LEAF EXTRACT:** Shown to be effective at having a positive effect on lipoproteins and total cholesterol values. Olive leaf extract has also been shown to have positive effects on glucose metabolism, as well as eliciting positive effects on circulating levels of key thyroid hormones such as T3

**BACOPA MONNIERA EXTRACT:** One of the most effective nootropic agents on the market, Bacopa is known for its cognitive enhancement effects, anti-anxiety properties, as well as having a positive impact on T4

**PARADOXINE™ GRAINS OF PARADISE EXTRACT (STD. 6-PARADOL):** Shown to activate brown adipose tissue (the metabolically active fat tissue) to increase thermogenesis and lipolysis.

**EVODIA RUTAECARPA EXTRACT:** An herb found in traditional Chinese medicine, Evodiamine is known for its ability to increase warmth in the body.

*Stop subjecting yourself to products that do nothing more than make you anxious, jittery, and aren't helping you shed fat any faster. Use a product that will make you feel as good as you are going to look. Use a product that will do more than just wake you up and get you going. Start burning fat with a product that actually holds true to the category name.*

**GET PYROXAMINE, AND DEFY LIMITATIONS!**

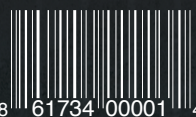

## A LEGITIMATE FEEL-GOOD FAT BURNER

### Supplement Facts

Serving Size: 1 Capsule  
Servings Per Container: 60

Amount Per Serving %DV	
<b>High Energy Matrix</b>	<b>241mg **</b>
Caffeine Anhydrous (75 mg)	**
Pikatriptin™ Picamillon (N-Nicotinoyl-β-Aminobutyric Acid)	**
Citicholine Sodium	**
Theobromine	**
Hordenine HCl	**
N-Methyltyramine HCl	**
Higenamine HCl	**
Huperzia serrata extract (std. min. 1% Huperzine A)(club moss)	**
Black pepper extract (std. min. 98% Piperine)(fruit)	**
Rauwolfia vomitoria extract (std. min. 90% Rauwolscine)(root bark)	**
<b>Accelerated Lipo-Regulating Matrix</b>	<b>340mg **</b>
Carralluma fimbriata herb powder	**
Olive leaf extract (std. min. 10% Oleuropein)	**
Bacopa monniera extract (2:1)(herb)	**
Paradoxine™ Grains of Paradise extract (std. min. 12.5% 6-paradol)(seeds)	**
Evodia rutaecarpa extract (std. min. 98% Evodiamine)(berries)	**
**Percent Daily Value (%DV) not Established	

Other Ingredients: Gelatin, Maltodextrin, Magnesium Stearate, Silica, FD&C Red #40, FD&C Blue #1

60 Capsules – Dietary Supplement with Paradoxine™
