

Did You Know That **99%** Of Your Body's Testosterone Is **Unused?**

Your Body Is Literally Holding Your Own Supply Of Testosterone Hostage – Leaving Tons Of Potential Muscle Growth On The Table...Read Below To Find Out How A Recent Discovery Can Unleash Your Testosterone And Increase Your “Free Test” (The Kind That’s Responsible For Muscle Growth) By Over 57%!

Dear Friend,

I don't think I need to tell you just how important Testosterone is to building serious muscle mass. Without enough Testosterone in your body you have a better chance of getting struck by lightning than you do building muscle. That's why *everyone* is doing *everything* in their power to increase their “T” levels as much as they possibly can... But what if I told you there's already enough “hidden” Testosterone floating around your body to build more thick, dense muscle than you'll ever want?

And...

All You Needed To Do Was Figure Out A Way To “*Unleash*” That Testosterone So You Could Gain More Natural Muscle Faster Than You Ever Imagined...

Well I have the answer you're looking for (hint: it will *instantly* switch your body to release an *enormous* amount of unused Testosterone – creating a virtual flood of muscle building, fat burning mayhem), but hang with me for a second so I can show you *exactly* how this recent discovery is changing the bodybuilding world...

Your body is smart. VERY smart. It does a tremendous job of controlling an unbelievably complex environment. For this reason it's also very protective. It *never* wants anything to become unbalanced or “out of whack”.

Therefore, it produces plenty of Testosterone in case you ever may need it in a life-threatening situation. This same amount of Testosterone that's in your body right now is also enough to build as much *natural* muscle mass as you'd ever want.

I'm not going to lie to you and tell you your body has as much “T” as a juiced-up bodybuilder...But you have *plenty* inside your body to develop a significant amount of muscle that will have everyone at your gym envious...

The one *major* problem is...

Your Body “Locks Up” 99% of Your Testosterone For Your Own Protection...

Why would your own body sabotage your quest to build the body you want? It's really quite simple (and even easier to turn off your body's testosterone “governor” and allow *massive* amounts of testosterone to run wild through your veins) once you understand all Testosterone is *not* created equally...

For this discussion (and really anything involving building muscle and gaining strength) there are two types of Testosterone you need to know about... “Bound Testosterone” and “Free Testosterone”.

Your total testosterone levels are made up of "Bound" and "Free" test. Unfortunately for you, 99% of your testosterone levels are bound, or locked up like a serial killer serving multiple life sentences...Bound test is completely unusable for building muscle, strength and burning bodyfat...

Just like the government keeps Charles Manson locked up so he doesn't go on a massive killing spree, your body wants to "protect" you from running around society with a huge amount of T pumping through your veins...

But we all know this is ridiculous. If all of a sudden you had massive amounts of test running wild inside your body you wouldn't use it to harm anyone...You'd be the *happiest* guy on the planet because you would **be building muscle, burning fat, gaining an enormous amount of strength**, feeling like your on top of the world...and maybe best of all...walking (or sprinting) around with a sex drive only Wilt Chamberlain can relate to!

Until now nobody – even the billion-dollar pharmaceutical companies – has figured out a way to increase your Free test without any *harmful* side effects...

Good thing you're a member of USPlabs Inner Circle...because we have formulated what we believe is the most *potent* (and safe) Free T-booster ever developed...

It's Called T.N.A and It's Here To Unleash Your Testosterone!

I'm sure your asking what T.N.A stands for so I'll skip right to the point...

T stands for Tribulus

I know, I know, there are a ton of Tribulus products on the market and it's *hardly* ground-breaking to include this in our formula. But most companies have either missed the point entirely or are just too cheap to include the *real* extract that has been proven in science to increase androgen levels, which directly increase your body's own production of Leutinizing Hormone (Testosterone).

As with everything else we've done, we've managed to uncover a "*secret*" Indian extract of Tribulus that contains a *special* saponin called Tribulosan. In fact, Tribulosan is so *rare* it's only found in miniscule quantities in only a few of the world's Tribulus plants. Bulgarian Tribulus, which is considered by many as the "Gold Standard" of Tribulus contains only 0.1 mg per gram of extract...and that is considered high by Tribulosan standards. **The special Indian Tribulus that only we harvest contains a whopping 8.3 milligrams of Tribulosan per gram...that's over an 8000% greater concentration of Tribulosan!!**

So we have included the secret, "**real deal**" pharmaceutical-grade Indian extract that will *significantly* increase your total test levels to ensure your body is pumping out as much natural T as possible.

TNA is the only supplement on the market to contain this Indian extract, which is supported in the recent study by Denchev, Janda, Evstatieva, Oleszek, Aslani and Kostova that was published in Phytochemistry Journal. 2007 Aug 22.

Our extract of Tribulus works in *perfect* symmetry with our next ingredients to form the **ultimate testosterone Booster**.

N stands for Nettle Root

Nettle Root is really an *awesome* compound. It has been proven in scientific studies to...

- Specific lignans, with varying activity, have been shown to inhibit binding of SHBG to endogenous androgens, potentially resulting in increased free (and consequently active) androgen levels in circulation (3).
- Was also shown in a study that used it along with avena sativa to increase sexual performance as well as sexual desire. In addition, firmer erections and an increased sense of well-being were reported (2).
- Has been shown to inhibit aromatase activity, which, in part, may help explain its beneficial effects upon benign prostatic hyperplasia

- (4).
- May reduce water retention (5).
- Has evidence supporting a beneficial effect upon those with BPH (Benign Prostatic Hyperplasia) (6).
- Has evidence supporting a beneficial effect upon osteoarthritis (7). It may reduce joint pain.

Wow! This is it folks...This baby will “*Unleash*” your bound up Test so you can enjoy all the benefits.

Another company has released Nettle Root and extracted it for the Lignan 3,4-divanillyltetrahydrofuran. While that works pretty good, our focus has been on the more powerful and potent Lignan 6,7-divanillyltetrahydrofuran that is up to 33% more effective!

A stands for Avena Sativa

Avena sativa is the final addition to T.N.A. It's really the icing on the cake so-to-speak to ensure your body is constantly (and naturally) pumping out Testosterone so our extract of Nettle Root can have enough “raw materials” to work with. Avena, along with Tribulus, will have your pituitary spewing out Testosterone like lava from Mt. St. Helen's...

Avena Sativa has been proven to..

1. Increase the release of LH from the pituitary (1).
2. Was shown in a study that used it along with nettle root, to increase sexual performance as well as sexual desire. In addition, firmer erections and an increased sense of well-being were reported (2).

So there you have it. This awesome combination of *perfected* extracts (remember, when dealing with natural compounds the extract is everything) Tribulus, Needle Root and Avena Sativa makes T.N.A...

The Most Synergistic (and Effective) Testosterone Booster EVER Created...

I understand you may be thinking to yourself this sounds too good to be true. If I were you I'd probably feel the same way. But understand I didn't just make this stuff up out of thin air. Everything I've just told you has *already* been proven in scientific studies! And you just can't argue *proven* scientific studies...

Again, here is a small list of what the ingredients in TNA have been PROVEN to do in published scientific research...

- Inhibit “Bound” testosterone – Frees up massive amounts of Testosterone in a state your body can put to use *immediately* to build muscle and burn fat.
- Naturally increases Leutinizing Hormone (Testosterone) –This is the hormone that determines just how much testosterone you will produce each day. Combine this with Freed up Testosterone and you will create the proverbial “Perfect Storm” of *increasing* Testosterone.
- Increase sexual performance
- Increase sexual desire
- Promote fuller, firmer erections
- Promotes prostate health – That's right...while every other T-booster known to man (including steroids) can have a negative effect on the prostate, the ingredients in TNA are actually *healthy* too!
- Decrease water retention
- May help joint pain

This is the *perfect* product for increasing testosterone levels. Not only does it increase free/active levels of circulating androgens (namely Testosterone), which is of the utmost importance, it has aromatase-inhibiting activity so you don't need to worry about excess estrogens.

Furthermore, you don't have to worry about issues with the prostate as the nettle root also works to prevent such issues. Last but not least, unlike products that may (or may not) increase testosterone levels, and consequently cause increased

water retention, the nettle root in the product may in fact decrease water retention.

So there you have it...**the most potent T-Booster known to man**. And we are only offering it to members of our Inner Circle.

We have done a very small run of just 202 bottles (Ok we made a few more, but we had to keep a few bottles for ourselves!). If I were you, I'd jump at this chance to get T.N.A right now before all the bottles are sold out.

Did I mention each bottle is only \$39.95 (which is way less than what it will retail for if and when we ever decide to release this bad boy to the general public)...and...if you buy 3 we will throw in a **FREE bottle**?

It's an *awesome* deal, but to be fair to everyone we have to limit the amount that you can buy to 6 bottles (you will receive 2 FREE when you buy 6 for a total of 8 bottles).

Each bottle lasts about a month so either stock up for yourself or get a few buddies together and get your supply now!
